Econo Gangway (Frame only)

Description :

Low profile, premium quality, aluminum gangway; it is ultra light and aesthetic. This gangway is designed – like all our products – to be maintenance free. It is specially made to fit with premium quality plastic panels and matching standard colours of our docks.

* Frame also available

* Frame 3’x8’ (#RL 34)
* Frame 4’x8’ (#RL 35)
* Frame 3’x12’ (#RL 86)
* Frame 4’x12’ (#RL 88)

Gangway (Frame only)

Description :

Premium quality aluminium gangway; it is ultra light and aesthetic. This gangway is designed – like all our products – to be maintenance free. It is specially made to fit with premium quality plastic panels and matching standard colours of our docks.

Candock also offers you a custom made manufacturing service if you can’t find a gangway meeting your specifications. NOTE: All gangways of 16’ or more should be reinforced with either handrails or a gangway reinforcement. Do not hesitate to contact us on this matter.

NOTE: All gangways of 16’ or more should be reinforced with either handrails or a gangway reinforcement. Do not hesitate to contact us on this matter.

* Frame also available :

* Frame 3’x12’ (#RL 36)
* Frame 4’x12’ (#RL 37)
* Frame 3’x16’ (#RL 38)
* Frame 4’x16’ (#RL 39)
* Frame 3’x20’ (#RL 40)
* Frame 4’x20’ (#RL 41)
* Frame 3’x24’ (#RL 42)
* Frame 4’x24’ (#RL 43)
* Frame 3’x28’ (#RL 44)
* Frame 4’x28’ (#RL 45)
* Frame 3’x32’ (#RL 46)
* Frame 4’x32’ (#RL 47)

Candock

Permanente 42” aluminium handrail

Product number : # RL 48

Description : Premium quality aluminium handrail – directly welded onto our gangways (not available with econo type gangways).

Removable 42” aluminium handrail

Product number : # RL 49

Description : Premium quality aluminium handrail. It is directly bolted on our gangways to make shipping simple and economical (not available with econo type gangways). It also facilitates storage.

Reinforcement for gangways

Product number : # RL 50

Description : The reinforcement for gangways is a slip type system directly welded onto our gangways in order to increase resistance (not available with econo type gangways).

Transition plate

Description : Nonslip aluminum plate fixed to our gangways assures a smooth a transition between the gangway and the Candock’s installation (not available with econo type gangways). This can also facilitate access with wheelchairs.

* Frame 3’x16’ (#RL 51)
* Frame 4’x16’ (#RL 52)

Start angle

Description : The start angle is a system allowing you to fasten a gangway to a fixed structure allowing it to follow water level variations. Available in the following widths:

* Available in the following widths:

* Frame of 3’ (#RL 53)
* Frame of 4’ (#RL 54)
* Frame of 6’ (#RL 56)

Candock

Start angle for Econo Gangway

Description : The start angle is a system allowing you to fasten a gangway to a fixed structure allowing it to follow water level variations. Available in the following widths:

* Available in the following widths:

  * Frame of 3’ (#RL 53)
  * Frame of 4’ (#RL 54)
  * Frame of 6’ (#RL 56)

HD start angle

Description : High resistance starting angle is a system allowing you to fasten a gangway to a fixed structure though allowing it to follow water level variations. It is designed to be used with 24’ or more gangways.

* Available in the following widths :

  * Frame of 3’ (#RL 135)
  * Frame of 4’ (#RL 136)

Candock’s Hinge system

Product number : # RL 57

Description : Hinge system allows you to tie an econo type gangway directly to a Candock’s installation – allowing it to follow water level variations. Use a 3’ gangway for a dock made of 3 cubes and a 4’ gangway for a dock made of 4 cubes. Entirely made of stainless steel with a nylon pivot, this system is very resistant and noiseless.

Gangway slider

Product number : # RL 58

Description : A plastic sliding piece is to be installed under the very end of the gangway – dock side – to allow it to move over the dock without damaging it.

Econo Gangway slider

Product number : # RL 59

Description : A sliding plastic piece is to be installed under the very end of the gangway – dock side – or under the transition plate to allow it to move over the dock without damaging it.

Gangway's roller

Product number : # RL 60

Description : Plastic covered aluminum roller to be installed under the dock end of the gangway to allow it to move on the dock without damaging it.

plastic panel

Description : Premium quality non-slip openwork design plastic panel for gangways.

* 1'x3' Grey (#RR TF 1'X3')
* 1'x4' Grey (RR TF 1'X4')
* 1'x3' Beige (#)
* 1'x4' Beige (#)

Ground anchorage

Product number : # RL 61

Description : Ground anchorage system for gangway to be used when the ground type permits it.
